March 8, 2012 Issue #31 Editor: Dan Banh

This Week:

Topic: The Healing Benefits of Past Life Regression

Speaker: Heather S. Friedman Rivera RN, JD, PhD

There are many books written about the healings of past life regression. A need was identified to quantify these reported healings. Hear about Dr. Heather and the leaders in this field and their research on the benefits of this, sometimes controversial, healing modality. Gain the knowledge to assess whether this method is effective for you. Hear the story about Dr. Heather's healing and spiritual transformation from past life regression and how that led her on the journey to research.

Dr. Heather F. Rivera has worked as a Registered Nurse for over 20 years. She obtained her Doctorate in Law in 2002, and her PhD in Parapsychic Science

in 2011, and she is a Certified Clinical Hypnotherapist specializing in Past-life Regression. She trained with Dr. Brian Weiss at the Weiss Institute. Dr. Rivera is the Co-Director of Research for IARRT and founded the PLR Institute for past life research. Her personal history with chronic illnesses prompted her to publish several articles on managing chronic illness, evaluating nutritional supplements, and utilizing holistic health approaches. She is currently completing her book on her research. Get more info. at www.pastlifesurvey.org

Next Week:

Natalie Cook, a former Rotary Interact member of our own Charter Oak HS, will share with us her experience working with World Made Flesh in Kolkata, India, an organization which provides an alternative employment to women whom otherwise would have been confined to sex trade business.

Last Week:

Roger Sharma from CVHP did an excellent job on explaining Health Care Reform and its impact on hospitals. With more than 30 millions uninsured Americans soon to be part of the health care system, you would think hospitals would be ecstatic about potential explosive increase in revenues. Not so according to Roger. Nothing comes easy when it comes to dealing with the government. More strict regulations and penalties will be enforced if jobs deem unsatisfactory. These will put a tremendous

strain of hospitals. They have to find a better, more cost-efficient delivery system at a reduced rate and without compromising quality care. That is a daunting task! Fortunately, at CVHP, we have the most dedicated, talented and diligent staff and this is just another bump on the road for them. They are prepared for the worst. As for all of us Rotarians, prepare to pay more taxes.
